Understanding the hybrid plan

A hybrid plan may work a little differently than other health insurance plans you've had in the past.

This plan is designed to meet the needs of individuals and families. You'll have coverage for things like:

- Hospitalization
- Maternity and newborn care
- Urgent care visits
- No-cost preventive care
- Doctor visits
- Specialty care
- Prescription drugs
- Laboratory coverage
- Choice of doctors and hospitals
- Telemedicine and telehealth visits
- ExerciseRewards® & Active&Fit® Direct fitness benefits
- Pediatric vision and dental
- \$50 reward for annual dental cleaning/exam

To help you understand your plan, this brochure provides explanations and examples.

Let's start with the basics

Your plan is hybrid because it is a blend of two types of plans which include:

- A deductible that has to be paid first for all medical care, and diabetic drugs and supplies.
- A copay for medical care such as when you go to your doctor when you are sick.

About the plan:

PREVENTIVE CARE can help you avoid getting sick and improve your health.

Preventive services such as routine physicals, screenings and vaccinations are covered in full. The deductible does not apply to preventive services; they are covered in full from the first day your coverage begins.

YOUR PLAN INCLUDES A DEDUCTIBLE. You have to reach your deductible first for all medical services, like going to the doctor when you are sick or if you have to go to the hospital.

The deductible also applies to diabetic drugs and supplies. The deductible does not apply to preventive services. They are covered in full from the first day your coverage begins.

YOU CAN GET A PRESCRIPTION FILLED at the copay level on the first day your coverage begins. You do not need to meet the deductible first.

ONCE YOU REACH YOUR DEDUCTIBLE, you will pay a copay for some services and coinsurance for others. Coinsurance is your share of the costs of a covered health service, calculated as a percent. You will have to pay a percentage of that service and the health insurance company will pay the rest.

TO HELP PROTECT YOU FROM HIGH COSTS, there is an out-of-pocket maximum. This is a specific dollar amount that limits how much you have to pay out of your own pocket for health care services during a particular time period.

Important terms to know:

Deductible - The amount of money you have to pay before the health insurance company will make any payments towards health care services.

Copayment (or copay) - This is a fixed amount you pay each time you use a medical service, such as a doctor's office visit, prescription refill or a hospital stay. For example, if your prescription drug coverage includes a \$20 copay, you pay \$20 for each prescription and your insurance pays the balance.

Coinsurance - Your share of the costs of a covered health care service, calculated as a percent. Coinsurance is similar to a copay, but instead of a fixed dollar amount, it is a percentage of the total bill. For example, if your daughter's eyeglasses are \$100 and you've met your deductible, your coinsurance payment of 20% would be \$20. The health insurance company would pay the rest, or \$80.

Covered in full - 100% of the total cost is covered by the health insurance company and you do not have to pay anything.

Out-of-pocket maximum - An annual limit on the amount of money that you would have to pay for health care services, not including your monthly premiums.

How does it work?

For example, your plan could include:

- \$25 primary care copays / \$40 specialist copays
- \$100 outpatient copays / \$1,000 inpatient copays
- \$600 individual / \$1,200 family deductible
- 0% coinsurance for most benefits
- \$4,000 individual / \$8,000 family out-of-pocket maximum
- Prescription drug coverage
\$10 / \$35 / \$70 copays

The top 4 things to know

1 What benefits are free?

- Preventive care for you (and your family) is covered in full on the first day your coverage begins.

2 Does my plan have a deductible? If so, when does it apply?

- Yes, this plan has a deductible.
- The deductible will apply to all medical care, including diabetic drugs and supplies.
- The deductible does NOT apply to prescription drugs.

3 How does the money I pay toward my deductible add-up (or aggregate)?

- Each person only has to pay his or her own deductible.
- When covering more than one person, the family deductible is met for everyone on the plan once any combination of members reaches the family deductible amount.
- Once you reach your deductible, the plan begins paying on your claims.

4 How much will I pay out-of-pocket for this plan? And how does it add-up (or aggregate)?

- All of our plans have a maximum amount that any one person will pay called an out-of-pocket maximum or Maximum Out-of-pocket (MOOP).
- This amount varies, depending on which of these plans you have. You will want to know what that amount is.
- Just like with the deductible, each person will only have to pay his or her own out-of-pocket maximum amount. Once that amount is reached, care is covered in full.
- When covering more than one person, care is covered in full for everyone once any combination of members reaches the family out-of-pocket maximum.

Below are a few examples of how a copay + deductible plan works:

You visit your primary physician for your Annual Physical	Your spouse needs a minor surgical procedure done in an outpatient setting	Your spouse needs an antibiotic prescription filled	Your spouse is admitted to the hospital for an emergency procedure
Actual cost: \$200	Actual cost: \$2,500	Actual cost: \$40	Actual cost: \$10,000
Plan pays: \$200	Spouse's deductible applies: \$600 Leaving a balance of: \$1,900	Spouse's copay: \$10 Plan pays: \$30	Spouse's deductible applies: Met
	Spouse's copay: \$100 Plan pays: \$1,800		Spouse's copay: \$1,000
You pay out-of-pocket: \$0	Spouse pays out-of-pocket: \$700	Spouse pays out-of-pocket: \$10	Spouse pays out-of-pocket: \$1,000
			Plan pays: \$9,000
	After this out-of-pocket payment, your spouse will have \$3,300 remaining to pay before reaching the individual out-of-pocket maximum. Once met, all remaining benefits will be covered in full.	The out-of-pocket maximum for your spouse is now reduced to \$3,290.	The out-of-pocket maximum for your spouse is now reduced to \$2,290
Preventive services are covered in full	Most hospital-related services are subject to the deductible and copay but always protected by the out-of-pocket maximum	Prescription drug copays apply toward the out-of-pocket maximum	Inpatient stays are subject to the deductible, but your spouse has met the individual deductible so he only had to pay the inpatient copay.

This is not a contract. It is intended to highlight the coverage of this program. Benefits are determined by the terms of the member contract.
